Serbian fruit juice producer enhances quality and efficiency with a new aseptic filler

FILLING SYSTEMS

Fruitful investment – aseptic line for Nectar in Serbia 114

Serbian fruit juice producer Nectar is raising the level of its technical equipment to totally unprecedented heights with a new aseptic filler from KHS. This is not only of benefit to the quality of its products but also to its efficiency in production.

When Nectar started up its first production line for processing fruit juice in beverage cartons 20 years ago near Novi Sad in the northwest of Serbia, there was no telling just how fast the company would develop ...

PROCESS TECHNOLOGY

Integrated process belt expertise for key industries. 118

The process belt specialists from GKD – Gebr. Kufferath AG will be presenting three focus topics atACHEMA, World Forum and Leading Show for the Process Industries. From June 11 to 15, they will be showcasing process belt solutions made of mesh and spirals for thermal treatment, dewatering, and filtration to the international trade specialists in attendance in Frankfurt am Main, Germany. The focus of the trade fair appearance is on the integrated expertise of the technical weavers. Process-dependent, custom product development and technologically leading manufacturing from a single source underline the efficiency of GKD belts that is in demand worldwide ...

SCIENCE & RESEARCH

Familial aggregation and sociodemographic correlates of taste preferences in European children 120

Taste preferences are the main food choice driver, especially in children for whom aspects such as healthiness and economics, e.g. food prices, generally play a minor role. If taste and food preferences derive from mere exposure, availability and familiarity, then the taste and food preferences of children should resemble that of their parents because they share meals and parents influence the availability of foods and drinks in the home. Further, it can also be assumed that the shared genetic information, environmental factors, as well as close personal interaction lead to similar taste and food preferences ...

Food safety: Keeping damaging influences out 124

Packaging is indispensable to ensure the shelf life of food products. It protects the product from damaging influences and prevents the development of microbes that are harmful to health. Nowadays, modern food packaging ensures a high degree of safety for consumers. Thanks to a combination of optimum packaging material, preservation and durable sealing, ideally tailored processes are available to food manufacturers. The most important suppliers of this technology will be showcasing their innovations once again at FachPack 2018 ...

Macfrut 2018, 25 % of exhibitors are from abroad 126

Macfrut 2018 is approaching and is scheduled for 9-11 May at the Rimini Expo Centre: this three-day event will feature key players in the fruit and vegetable sector, one of the leading sectors in Italy, which ranks second for “Made in Italy” agri-food exports.

As exports continue to grow, so does Macfrut: more than 55,000 square metres of space occupied (+10 % compared to 2017, +100 % in four years), 8 halls, more than 1,100 exhibitors, of which 25 % are from abroad (+40 % in four years), and 1,500 buyers invited from all over the world. Macfrut, the only international trade fair for the fruit and vegetable supply chain, will feature 11 exhibition sectors representing all the segments of the industry ...
